

MASTERPLAN FOR THE UNIVERSITY OF ORADEA

Architect	ADEST ARCHITECTURE
Location	Oradea, Bihor County
Function	Masterplan
Scale	> 300 000 sqm
Client	Oradea City Hall & The University of Oradea
Year	2018

The campus consists mainly of medium-rise buildings displayed around urban open spaces. The concept of the proposal revolves around a green spine that connects the urban and architectural elements of the campus while providing compositional unity. The new architectural programs are therefore interconnected based on an integrated system of public and green areas. The traffic will be restricted in the campus area, the University Street thus becoming a carriage way for public transportation. New public squares are provided for relaxation purposes, transit, meeting points, pedestrian redistribution, and connecting different functions. The Masterplan integrates the existing buildings and articulates the public spaces and the new buildings in order to create a series of «green-labs».
